

Integrative Project - Spring Semester 2021/2022

Project Requirements

This document describes the work to be developed by the teams during the semester. Most of the software application features are informally described from an end user's perspective. The Integrative Project will be developed in four sprints:

Sprint A. Integrative Project Analysis

- *Requirements Specification and Analysis*
- *Configure the Bitbucket Repository*

Sprint B: User Stories to develop

- *(available in the last day before the beginning of the sprint)*

Sprint C: User Stories to develop

- *(available in the last day before the beginning of the sprint)*

Sprint D: User Stories to develop

- *(available in the last day before the beginning of the sprint)*
